

FAQ

Questions, answered.

Do I need to install an app?

How does the AI pick recommendations?

Which languages does the bot speak?

English, Hindi, Punjabi, Tamil, and Hinglish. It handles typos, voice notes, and mixed-language messages fluently.

What happens if my food is late?

Is my payment information safe?

FAQ

Questions, answered.

Do I need to install an app?

How does the AI pick recommendations?

It combines your order history, dietary preferences, current mood signals, live kitchen wait times, and macros to score every menu item in real time.

FAQ

Questions, answered.

Do I need to install an app?

No. SmartFood works entirely in WhatsApp. The student dashboard is optional — for tracking spend, rewards, and history.

HOW IT WORKS

Four steps. Zero learning curve.

01

Say hi on WhatsApp

Save the SmartFood number. That's your only setup.

02

Chat what you're craving

"Something spicy, under ₹150, ready in 10 min."

03

Confirm & pay

The AI picks the perfect stall. Tap once to reserve.

04

Pick up. Eat.

Show the QR at the counter. Skip the line entirely.

AI FEATURES

The smartest kitchen on campus.

Every feature is designed to disappear — so the only thing you notice is your food arriving faster.

AI Recommendations

Personalized picks trained on your history, mood, and macros — updated per meal.

Smart pickup slots

The kitchen schedules you. No more waiting in line.

Live queue intelligence

See waits across every stall on campus in real time.

One wallet, everywhere

Top up once. Pay across 40+ campus stalls in a tap.

Multi-language chat

English, Hindi, Punjabi, Tamil — talk to the bot however you like.

Voice ordering

Send a voice note. AI transcribes, confirms, and books.

THE PROBLEM

Campus lunch shouldn't feel like a full-time job.

20+ min queues

Students lose lunch breaks standing in line during peak hours.

Sold-out favorites

By the time you reach the counter, the special is gone.

Cash fumbling

Slow payments jam the counter and delay every order behind you.
